

CURRENT TRANSFORMERS

Technical Information

SPLIT-CORE CTs

DENT Split-Core CTs offer the greatest utility at the lowest cost. These internally shunted CTs are intrinsically safe and can be used on “live” conductors without turning the load off.

Split-Core Series CTs are available in several window sizes and for loads from <math><5A</math> to 1200A loads.

Standard Features Include:

- Nominal Rating ranges from 50 to 1000A
- Accuracy $\pm 1\%$ from 10% to 130% of rated current
- Frequency Range of 50 Hz to 400 Hz
- Shrouded core blades for protection during installation
- Snap closing/opening feature
- Meet CE and ETL C57.13

High Accuracy 5A CT Features:

- Nominal Rating is 5A
- Accuracy $\pm 1\%$ for 0.05 to 7A
- Frequency Range of 10Hz to 10KHz
- Excellent low current sensitivity
- Spring loaded core
- ETL recognized per UL506

CLAMP-ON CTs

DENT Clamp-On Style CTs are specifically designed to offer broad utility in a compact shape. The spring-loaded handles make frequent installation and removal a “snap!”

These CTs deliver high accuracy, high sensitivity, versatility and low phase shift making these probes an excellent choice for use in a wide range of current and power measurement applications.

Clamp-on CTs are ideally suited for short-term metering applications where their ease of use and one-handed operation greatly reduce workload.

Standard Features Include:

- Nominal Rating of 150, 500 or 1000A
- Accuracy for each:
 - $\pm 1-1.5\%$ for CON-0150
 - $\pm 2.5-3.5\%$ for CON-0500
 - $\leq 0.5-3\%$ for CON-1000
- Frequency Range for each:
 - 40 Hz to 10 kHz for CON-0150
 - 48 Hz to 1000 Hz for CON-0500
 - 30 Hz to 5 kHz for CON-1000
- CE Mark, Conforms to IEC 1010-2-032

ROGOWSKI (FLEX) CTs

DENT's Rogowski Coil Current Transformers have no metal cores which make them extremely flexible and light weight. Because they lack a metal core, Rogowski coils have very low phase shift error, can be used on very high currents, and are suitable for highly distorted AC waveforms.

These “rope” style CTs are designed to take measurements where standard current sensors cannot. Large buss bars, cable bundles, and irregular shaped conductors will no longer be a challenge when using this flexible CT.

Standard Features Include:

- Nominal Rating of 300/3000A
- Accuracy $\pm 1-4\%$, depending on CT orientation
- Frequency Range or 40 Hz to 5 kHz
- Remembers shape, allowing for pre-forming before use and simplifying installations in difficult to reach situations
- 90 cm (36”) long, window size of 29 cm (11.5”)
- Very low phase shift error
- CE Mark, Conforms to IEC 1010-2-032
